

```
#!/usr/bin/env python3 """homura_recon.py - NETWORK-RECON/SCANNER - V1.0.0 -
DEVELOPED BY SONOZAKI_SHION HOW-TO USE homura_recon.py > FIRST-OF-ALL:
```

1. This is NOT A Tool for unauthorized-tests and such network recon tests shall not be done illegally as under the liability of this softwa>
2. ONLY Use it legally and not for causing trouble/computer misuse with my software, YOU HAVE BEEN WARNED.

What It Does

Recon(Default): *Confirms the recon/scans on networks*, automatically with fallback on three independent axes so a single blocked path never yields a false negative: """
